

PenChuck Version History:

v1.1.2 Released 1/24/11

Mac only -- re-compiled to be compatible with Java 1.5 (for PowerPC Macs).

v1.1.1 Released 1/10/11

Fixed a problem where clicking in the track of a slider sometimes did not register a change.

v1.1 Released 1/7/11

Moved the application to the Netbeans Platform window system. This offers:

- * the ability to move and resize windows
- * the ability to "undock" windows and place them anywhere on the screen
- * window sizes and positions are remembered the next time you launch the software
- * use "Window" -> "Reset Windows" to revert back to the default

Help files are now included for documentation

Some re-positioning of controls within the windows

More robust installer for Windows and Linux users

v1.0.1 Released 12/04/10

Made the size of the window fixed.

Changed labels: Pen Position & Pen Width

Change resolution of Pen Position slider

Release disk image (.dmg file) for Mac users and .zip for Windows users

v1.0 Released 11/20/10
